

FAQ

Velvet Powder

What is a Velvet Powder Pen?

The Velvet Powder Pen is a nozzle applicator that dispenses fine velvet flocking fibres. When applied over a tacky adhesive it creates a beautifully soft, velvet-like finish on your papercraft projects.

Which Adhesive Should I use?

Our Velvet pens need a tacky adhesive such as:

- Zig Squeeze & Roll Pen
- Zig 2 Way Glue Pen
- Quickie Glue

Can I reuse the excess powder?

Yes! When using the pens, collect any excess powder onto a sheet of paper, pop the lid off our pens and funnel it back in to use again.

How are they used?

1. Apply adhesive where you want the velvet effect.
2. Hold the Velvet Powder Pen over the adhesive.
3. Squeeze (or puff) the pen to release the fibres.
4. Cover the adhesive evenly with the fibres.
5. Gently press the fibres into the adhesive and infill any gaps.
6. Tap away the excess fibres and return them to the pen.

Can I mix the colours?

Yes! Layer or blend different Velvet Powders onto tacky adhesive to create your own custom colours and effects.

What can I make with them?

Our Velvet Powder Pens can be used for all sorts of ideas, From card making, decorating MDF, Building 3D Craft Projects to finishing touches.
